Timeline

Timeline of The Project

Brainstorming ✓	We first started by establishing the mission of our company and brainstorming project ideas which included research and discussing with our host company.
Connecting With Institutions	Connecting with other institutions would be a long process with a large wait time and no guarantee of success or response.
Infographics ✓	Infographics seemed like a no brainer to us as it was a easy, fun and simple way to reach new audiences.
Updating Parts Of The Website	Updating parts of the website was a big responsibility we did not feel comfortable taking onto and therefore decided to downscale.
Food Drive	We had gotten permission to have one of the Big Reuse trucks to drive to SBU to pick up donations from students and staff. Urszula advised us that in the past, food drives were not successful and had limited results so we decided to not go through with it.
Creating A Sustainability Map ✓	After some more brainstorming and planning with Bella on a time crunch, we decided to collect data and plot them on a 2-D google map.

Our Ideas & Contributions

01

Find Organizations

Organized organizations that focus on giving back to the community.

02

Created Maps

Created custom maps so that user could easily access the locations

03

Infographic

Created an infographic that easily explains the purpose of Big Reuse

BIG REUSE

**DIVERT WASTE FROM OUR LANDFILLS AND
REDUCE GREENHOUSE GASSES IN THE
ATMOSPHERE**

DID YOU KNOW ?:

New York City sends 12,000 tons of waste to landfills every day, at serious cost to the quality of urban life.

WHAT CAN YOU DO ?:

DONATE!!!

Donate items that you don't want and we will find a better home for it, or come and buy items from YOUR COMMUNITY

OUR IMPACT :

- 1mil lbs of used items diverted from the landfills and kept in use.
- 2.3 mil lbs of food scraps and yard waste processed into compost.
- 11k homes canvassed as we build NYC's city-wide composting program.

Building The Map Model

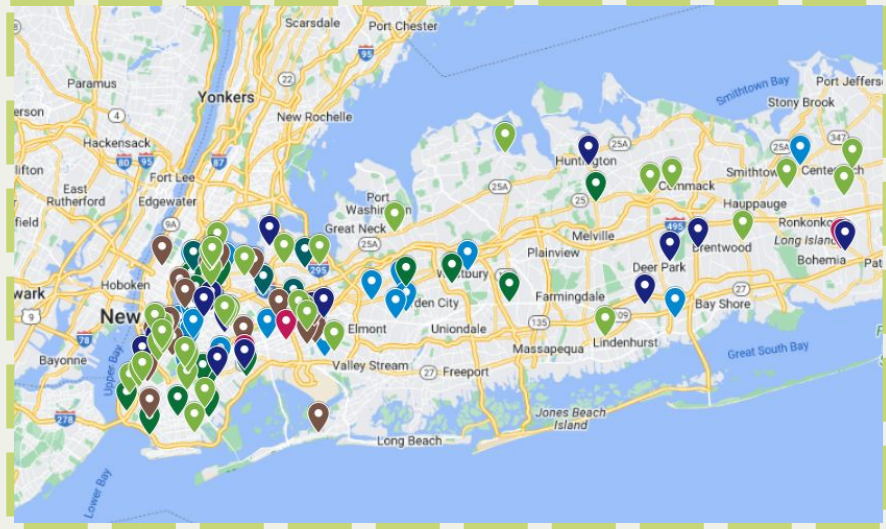

After gathering all the types of data we wanted, we were able to implement the resources into our usable Google Map.

Map Overview

-  Thrift Store
-  Donation Center
-  Food Scrap Compost
-  Electronics
-  Recycling Centers
-  Food Banks
-  Medical Waste

04 Analysis

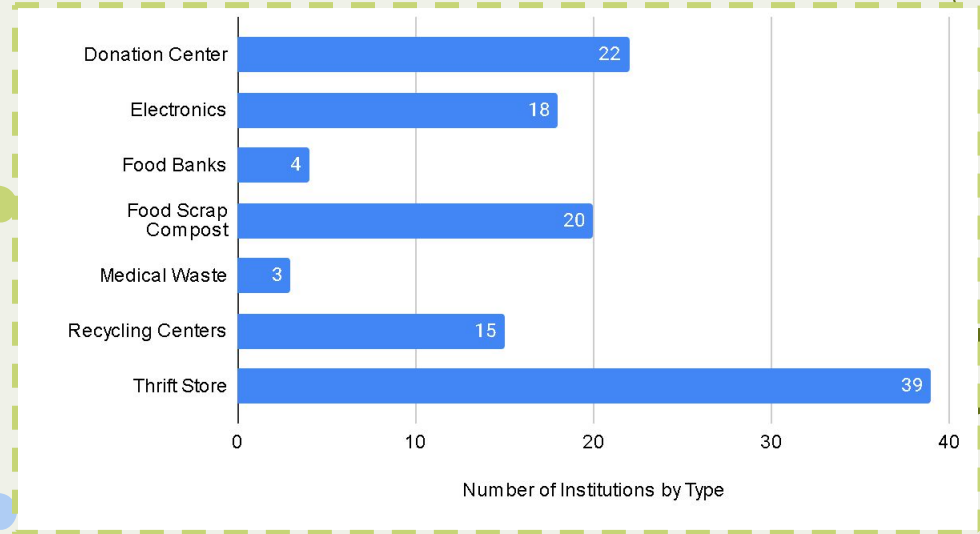

Stem Connection

The virtual map and infographic utilized technology as we used various platforms such as Google Sheets, Google Maps, My Maps by Google, Open Databases, Canva, Zoom, etc.

Outcomes

- We've found a total of 121 potential organizations in Queens, Brooklyn and Long Island.
- Difficulties we've ran into
 - Outdated sites
 - Missing contact info
- We believe that this project would be helpful for organizations and communities to reach sustainability.

Reflection

- There are a lot of really cool ideas we've came up with Bella
 - However, due to limited time, we can only create a map and infographics.
 - Limited skills
 - What could we have done better
 - We could have spent less time on deciding what ideas we should do.
 - We could have expanded the data to every borough.
- 
- 

What Went Well

- **Communications and Technology**
 - We had good communications with each other.
 - Everyone had something to work on.
 - We held couple of meetings via Zoom and Discord outside of class time to make sure that we're on track.
- **Meetings with Bella (via Zoom and Email)**
 - Biweekly meetings
 - Both ends agreed and are happy with the project idea we decided to do.

Skills Improved/Gained

- **Technical Skills (Data Collection and Management)**
 - Become more familiar with applications like Google Sheets, My Maps by Google, and Canva
 - **Problem Solving Skill**
 - Planning what kind of project we want to do based on the resources available
